

CS 440 Meeting Minutes

Group: 11 Date: 10/23/2021 Time: 12 pm Duration: 60 minutes

Present, on time: Jon Heikkinen , Alejandro Cabral , Michael Chau , Alen Peter

Present, not on time:

Absent:

Synopsis:

- Discussed implementation of ideas we had for our pages. Continued discussion on how we want our appointment database schema to look, as well as potential changes to the medical staff database schema in order to allow more robust usage when dealing with appointments (Additional fields specific to medical staff).

Recent Individual Accomplishments:

Jon: Made good progress on the change email/password features.

Alejandro: Have a rough calendar that that semi works, needs to be polished up

Michael Chau: Have implemented part of it locally but still have a couple of errors that need to be fixed

Alen: Made some improvements on implementing the back button.

Current Individual Activities:

Jon: Putting finishing touches on the change email/password features, while continuing to develop tests in order to eliminate potential bugs. Adding edge case tests as I think of them.

Michael: Making google API display location correctly

Alen: Working on implementing back button.

Alejandro: Finishing the calendar to sync correctly with database for both users

Individual Action Items:

Jon: Once we have our second database for medical staff up and running, refactor login verification code to accommodate both databases, as well as the email/password change features. Will create an enumeration in order to determine which login is being used.

Michael: Google API that is fully functional with no bugs

Alen: Test and finish back button for current working pages.

Alejandro: Upon calendar completion, implement the prescription pages
